983 Bataan Homes Jeremiah Street Brgy. San Jose Balanga City, Bataan, 2100 Philippines

EDUCATION

Bachelor of Science in Information Technology

Cavite State University - Carmona Campus

2014 - 2018

Secondary Level

Bulihan National High School

2008 - 2012

Primary Level

San Gabriel II Elem. School

2006 - 2008

EXPERTISE

- FullStack Development
- Project management
- Web development
- System administration
- Payment Service Integration

PROFILE

Web developer with hands-on experience in developing databases, creating user interfaces, writing and testing codes, trouble shooting simple or complex issues and implementing new features.

WORK EXPERIENCE

MTMGroup

OCT 2025 -Aug 2026

SR FRONTEND Developer | Contractor

- Developing and maintaining the frontend of 4 online casino brands (SpinBet, SpinBit, Casiny, VegaStars) using Next.js, React, and TypeScript
- Building and maintaining reusable UI components following Atomic Design, documented in Storybook
- Working on core casino modules challenges and rewards, wallet and cashier, registration and authentication, casino lobby, VIP, referral, and tournaments
- Developing and maintaining the back office (admin panel) used to manage platform and CMS content
- Creating and structuring the CMS data banners, promotions, dynamic page sections, menus, and feature flags consumed by the customer-facing sites
- Building and consuming back-office API endpoints that serve content and configuration to the frontend
- Developing CMS-driven dynamic pages and feature flags so marketing can publish content and toggle features without a deployment
- Coordinating data structures across the back office, CMS, and frontend to keep the rendered content consistent with what is configured
- Integrating REST APIs and real-time features (Pusher) into the frontend
- Implementing multi-language (i18n), responsive, and accessible (WCAG 2.1 AA) interfaces

- Implementing multi-language (i18n), responsive, and accessible (WCAG 2.1 AA) interfaces
- Writing unit, integration, and E2E tests using Jest, React Testing Library, and Playwright
- Reviewing other developers' code through pull requests
- Fixing production issues and monitoring errors using Sentry and Grafana
- Collaborating with designers, QA, and backend developers in an Agile workflow using Jira
- Using AI tools like Claude Code and GitHub Copilot for development, code review, and refactoring

Tech Stack:

- Next.js, React, TypeScript, MUI, Emotion, Recoil, TanStack Query, Framer Motion, Pusher, next-i18next, Jest, React Testing Library, Playwright, Storybook, Sentry, Grafana, Redis, Git, GitHub Actions, Jira

Projects:

- https://vegastars.com/
- https://www.spinbet.com
- https://www.spinbit.com
- https://www.casiny.com

ERNI Phillipines - Collins Aerospace

Nov 2024- OCT 2025

SR FRONTEND Developer

- Developing and maintaining Microservice API's.
- Developed the UI design and API integration for a DEMO frontend website to track IATA-compliant TYPE B aviation messages, including aircraft movement, message creation and updates, and error handling for specific message types. Also implemented user access controls within a “circle of trust,” enabling designated users to view, edit, and create messages within their group.
- Developed the UI design and API integration for a TEST CMS to track user messages under the circle of trust of the main admin or head, who manages country-specific messages, including displaying notifications for any message updates.Working with the wider development team.
- I also created automated test scripts and backend APIs using Python.
- Reviewing other developer's code.

Tech Stack:

- AWS, Python, Typescript, Next JS, Gitlab

Projects:

- DEMO FE: collinscargoconnect.com/login
- TEST CMS: cms.collinscargoconnect.com/login

INDEPENDENT CONSULTANT DEVELOPER Aug 2024- Nov 2024

- Collaborating with the development team to deliver scalable digital solutions.
- Designing and developing front-end interfaces for the Online Games Site, Business Landing Page, and Web Portals.
- Managing website design with a focus on responsive and user-friendly UI/UX.
- Leading backend processes involving payment integrations using cryptocurrency (USDT), Dragonpay, GCash, and PayMaya for local companies.
- Developing serverless microservices APIs to support seamless integrations and automation.
- Primarily focused on both the front-end and back-end development of client and partner portals, ensuring secure, scalable, and user-centric experiences.
- Contributing to the continuous improvement of systems in line with Portalink's mission of streamlining business processes and providing tailored, tech-driven solutions.

Tech Stack:

- AWS, Heroku, Node JS, Serverless, React JS, Typescript, Next JS, Nest JS, Express, PosgreSQL,Jira, MongoDB and Mysql.

Projects:

- https://zen-ritchie-cd93b3.netlify.app
- https://1of1m.netlify.app
- https://gemstar-engineering-services.netlify.app/

Racing Victoria Australia

AUG 2023- JULY 2024

SR FULLSTACK DEVELOPER

- Developing and maintaining Microservice API's.
- Developing the UI design for the MRED and PRP portals, we created these platforms from scratch.
